pypi.org/user/itsF4LCON

Looking for

A security or privacy internship, ideally with Cloudflare's 1.1.1 team or the Anthropic Fellows Program.

Projects

aps (github.com/itsF4LCON/aps)

Rust, Cloudflare Workers, D1, KV, Workers AI

Anti-phishing scanner that runs at the edge and gives a verdict on a URL in about 15 ms. Known domains are answered from a D1 threat cache, and new ones are classified with Workers AI. It has a public API with self-service keys and rate limiting.

hive (github.com/itsF4LCON/hive) and **hive-blocklist** (github.com/itsF4LCON/hive-blocklist)

Rust, Python, Cloudflare Workers, GitHub Actions

Low-interaction SSH and HTTP honeypot that records every login attempt and probe without ever letting anyone in. A Cloudflare Worker feeds a live attack map and weekly public reports. GitHub Actions rebuilds a free blocklist every week in iptables, nginx and plain-text formats.

postburn (github.com/itsF4LCON/postburn)

Rust, Durable Objects, WebCrypto

One-time secret links. The browser encrypts with AES-256-GCM, and the key stays in the URL fragment, so the server never sees it. Each secret lives in its own Durable Object and is deleted in the same step it is read, so it can be read once even when requests race. No server-side logs.

desk (github.com/itsF4LCON/desk)

Rust, WebRTC, Cloudflare Tunnel and Access

Self-hosted remote desktop for Linux in any browser: 1080p60 hardware-encoded H.264 over WebRTC, behind Cloudflare Tunnel and Access, with a password and TOTP.

Skills

Languages	Rust, Python, JavaScript, Swift, C#, GDScript
Edge and infra	Cloudflare Workers, Durable Objects, D1, KV, Workers AI, Tunnel, Access, Linux servers
Security	Honeypots, threat intelligence, phishing detection, applied cryptography, OSINT
Web	HTML, CSS, Tailwind CSS, WebRTC, browser extensions
Other	Computer vision with OpenCV and MediaPipe

Languages

Dutch	Native
English	Fluent
